

Press Release

HiRel Systems LLC Receives ISO 13485 Medical Device Certification

MINNETONKA, MN USA, March 1, 2010

HiRel Systems LLC, a global electronics supplier to the medical device industry, announced today that it has received an ISO 13485 Certificate of Registration issued by BSI effective December 2, 2009. This certification is a major milestone in HiRel's 8-year history and confirms HiRel's steadfast commitment to continual improvement, risk management, compliance with statutory and regulatory requirements, and complete customer satisfaction.

ISO 13485 is an internationally recognized quality system standard for the design, development, production, and distribution of medical devices. It ensures conformity with specified quality controls in the development of safe and effective medical devices.

According to HiRel's President, Paul Larkin, "HiRel continually strives to be the leader in providing best-in-class solutions for magnetic / telemetry components and assemblies used throughout a wide range of medical products. This certification is a tribute to HiRel's continued focus on exceeding customer expectations, and validates our commitment to meeting high quality standards."

About HiRel Systems LLC

HiRel is a worldwide leader in the design, manufacturing, and sale of custom electronic components and power assemblies including transformers, inductors telemetry coils and power supplies. HiRel products are used in a variety of high-reliability application in the medical, defense, aerospace and other commercial markets. For more information, please visit www.hirelsystems.com.
